

Professional roofing accessories

September 2010

COSHH Sheet

Health and Safety Data

We have concluded, subject to the information available, that none of the products listed below supplied by us constitutes any likelihood of a risk to health:

- GRP Flashings
- Roof Void Ventilators, Filler Combs & Support Trays
- Dry Fix Verge Products
- Polymer Based Woven And Coated Sheeting

Since all our products have a plastic content, toxic gasses will be given off if heated or burned. This situation calls for the correct fire fighting procedures to be adopted for dealing with toxic gases.

We would also recommend the wearing of gloves when handling our GRP products to avoid possible abrasions.

Note:
